TECHNICAL SKILLS

- Intermediate in Git, C, Python, Java, JavaScript, and React programming

PROFESSIONAL OBJECTIVE

To obtain a full-time software engineering position after graduation in Spring 2023.

PROFESSIONAL EXPERIENCE

Embedded Systems Software Engineering Intern

John Deere // Des Moines, IA // May 2022 - July 2022

- Developed a new virtual simulator to administer automated and manual software tests
- Implemented computer vision libraries to develop new software features
- Analyzed field data to create and refine an image processing algorithm
- Collaborated with team members to efficiently develop essential software deliverables

Embedded Systems Software Engineering Intern

John Deere // Des Moines, IA // May 2021 - July 2021

- Learned new software tools to develop and deliver new software features
- Thoroughly tested code contributions to go above and beyond expectations
- Actively participated in Agile Development rituals
- Collaborated with scrum team members to meet sprint requirements
- Experienced working on real-time projects in a development team

App Development Intern

John Deere // Moline, IL // June 2019 – May 2019

- Utilized technological skills as a Product Manager to collaborate with a development team to create and produce a usable app for John Deere
- Collaborated with developers and team members to enhance supportability and identify performance bottlenecks
- Worked effectively with team members to create software solutions that elevated client-side experience and significantly improve functionality

WORK HISTORY

Software Engineering Peer Mentor

Iowa State University // Ames, IA // August 2021 – Present

Engineering Standards Intern

John Deere // Moline, IL // June 2020 - August 2020
